

THOMSON SIBUEA

Data Scientist | Web Developer | AI Enthusiast
sibueathomson@gmail.com • https://github.com/thoms0504 • Bandar Lampung, Indonesia

Summary

I am a focused Data Scientist and Web Developer with a strong passion for environmental issues and cutting-edge technologies like machine learning and remote sensing. With a proven track record of enhancing statistical processes and stakeholder engagement within government agencies, I aim to leverage my skills in data science to develop impactful solutions for both the public and private sectors

Experience

Badan Pusat Statistik
Lampung Province, Indonesia

IT Technician
12/2024 - Present

Government agency responsible for statistical information

- Delivered statistical processing and dissemination of over 20 reports using high-quality products.
- Delivered over 20 high-quality statistical reports monthly, ensuring accuracy and timely dissemination.
- Provided IT support to 15 internal agencies, maintaining 99.9% uptime for critical technology services.
- Created more than 5 processing websites to streamline statistical and administrative tasks across the agency.
- Created and uploaded 30+ weekly data visualizations, enhancing statistical literacy and public engagement.
- Directed protocol logistics for 5+ large-scale events related to the 2026 Economic Census and diverse sectoral statistical activities.

Kementerian Perindustrian Republik Indonesia
Jakarta, Indonesia

Data Analyst
03/2024 - 12/2024

The Ministry of Industry of the Republic of Indonesia

- Analyzed and processed trade development data for 50+ Harmonized System (HS) Codes, providing critical insights into Indonesia's export and import trends.
- Transformed complex datasets into professional visual reports and informative dashboards to support data-driven strategic decision-making.
- Spearheaded stakeholder engagement for 100+ companies, optimizing monthly production reporting cycles and ensuring 100% institutional data compliance.

Badan Pusat Statistik
Cilegon City, Banten, Indonesia

IT Technician
08/2023 - 10/2023

Government agency responsible for statistical information

- Validated and processed survey datasets from 50+ accommodation establishments, ensuring high data precision and alignment with national statistical standards.
- Produced and edited high-quality video content for the "Exemplary Statistician Award," effectively highlighting organizational achievements and employee excellence.
- Conducted on-site field verifications (ground checks) for socio-economic registration data across 5 districts, ensuring the integrity and accuracy of regional statistical profiles.
- Developed and streamlined an automated honorarium management system for external partners, enhancing administrative efficiency and payment transparency.

Politeknik Statistika STIS
Jakarta, Indonesia

Web Developer
12/2022 - 08/2023

Statistical Polytechnic institute

- Developed a centralized web-based dashboard using CodeIgniter 4 to aggregate and visualize diverse field study results, streamlining data accessibility and reporting.

Experience

Politeknik Statistika STIS
Jakarta, Indonesia

Data Analyst
03/2023 - 06/2023

Statistical Polytechnic institute

- Visualized key research findings by developing 20+ dynamic graphs and tables, and managed their integration into the field practice dashboard to ensure real-time data accessibility.

Badan Pusat Statistik
Jakarta, Indonesia

Field Data Verifier
02/2023 - 02/2023

Government agency responsible for statistical information

- Executed rigorous cross-verification and validation of socio-economic registration datasets, maintaining the highest standards of data integrity and consistency.
- Facilitated in-depth investigative interviews with respondents to authenticate survey inputs, effectively resolving discrepancies and ensuring data reliability.
- Guaranteed data-to-field alignment by auditing statistical outputs, ensuring that all reported data accurately reflected the complex socio-economic reality of the target population.

Key Achievements

Delivering Mission-Critical Statistical Systems at National Scale

Led end-to-end delivery of 20+ official statistical publications and 200+ monthly reports, developed 5+ web-based processing systems, and maintained 99.9% service uptime, ensuring reliable, high-impact statistical operations across multiple government units.

Transforming Complex Data into Actionable Policy and Industry Insights

Analyzed national trade and industrial datasets covering 50+ Harmonized System (HS) Codes, translating complex data into executive-ready dashboards and analytical reports that supported regulatory compliance and data-driven decision-making for 100+ organizations.

Bridging Technology, Analytics, and Field-Level Data Integrity

Combined web system development (CodeIgniter 4), advanced data analysis, and on-site field verification to validate socio-economic datasets, conduct investigative respondent interviews, and ensure statistical outputs accurately reflected real-world conditions.

Education

Politeknik Statistika STIS
Jakarta, Indonesia

Bachelor's Degree | GPA: **3.70** / 4.0
09/2020 - 08/2024

Institut Teknologi Sepuluh Nopember (ITS)
Surabaya, Indonesia

Bachelor's Degree | GPA: **3.58** / 4.0
09/2019 - 06/2020
